CHRISTIAN CAMILO

FULL-STACK DEVELOPER // PERFORMANCE-FOCUSED WEB SYSTEMS // AI-AUGMENTED WORKFLOWS

CHRISTIAN@AKABUSINESS.TECH +57 320 953 8768 GITHUB LINKEDIN COLOMBIA / REMOTE

[01_EXECUTIVE_SUMMARY]

Full-stack developer and founder of AKA Business, focused on building fast, reliable web platforms for businesses that need clear execution, practical automation, and measurable performance. I combine frontend, backend, infrastructure fundamentals, and AI-assisted workflows to ship polished digital products with speed and technical care.

[02_STRATEGIC_EXPERIENCE]

AKA BUSINESS

PRESENT // FOUNDER

FULL-STACK DEVELOPMENT & DIGITAL SYSTEMS

Building a technical studio for business websites, e-commerce flows, and automation-ready digital systems. Responsible for discovery, UX direction, frontend delivery, backend integration, deployment, and performance tuning.

AKA SOUNDS

CEO & LEAD DEVELOPER

E-COMMERCE PRODUCT DEVELOPMENT

Designed and launched an e-commerce platform for digital audio products in a focused 21-day sprint, handling the technical build and product workflow from concept to release.

- Product structure for sample packs, downloadable assets, and multi-line catalog growth.
- Payment, authentication, and delivery flows prepared for international customers.
- Performance-focused frontend experience for producers and audio engineering clients.

RAMA JUDICIAL

AUDITOR & TECH SUPPORT

SYSTEM SUPPORT & INFORMATION CONTROL

Supported technical operations and information control processes in a public-sector legal environment where reliability, confidentiality, and traceability were essential.

- Assisted with audit routines, records review, and information flow verification.
- Provided technical support for users and systems involved in legal service continuity.

GLOBAL CONSULTANCY

FREELANCE / USA & LATAM

WEB PERFORMANCE & DELIVERY

Delivered websites and digital improvements for clients in construction, retail, and service businesses. Focused on clean implementation, Core Web Vitals, responsive interfaces, and practical conversion improvements.

PROCOLOMBIA

THESIS PROJECT // DEV

FULL-STACK SYSTEM DEVELOPMENT

Developed a PQR management system for complaints and requests as an academic full-stack project connected to institutional service workflows.

- Full-stack development using .NET Core for the backend and Angular for the interface.
- Structured request tracking, user flows, and service information handling.
